

OMNIS MANAGED PORTFOLIO SERVICE

OMPS Managed Portfolio Service monthly update for Adventurous investors

Toni Meadows
Chief Investment Officer

Who is this investment for?

The Service is designed for an adventurous investor, who should be:

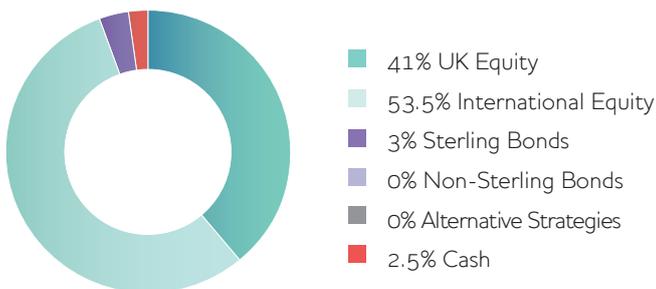

- An experienced investor who has used a range of different investment products in the past.
- In general terms, they will understand that investment products should be held for a minimum period of five years.
- They will be prepared to accept fluctuation in the value of their investments in order to be able to obtain a higher rate of return in the long run.
- They are similarly not likely to be concerned if the value of their investments were to fall in the short term.

The Service aims to deliver a total return and actively manage short-term risks through increasing or decreasing holdings in asset classes and individual funds. These allocations are determined by the Openwork Wealth Services Limited investment team, which benefits from full transparency of the funds' underlying investments, and is controlled through a strict governance framework.

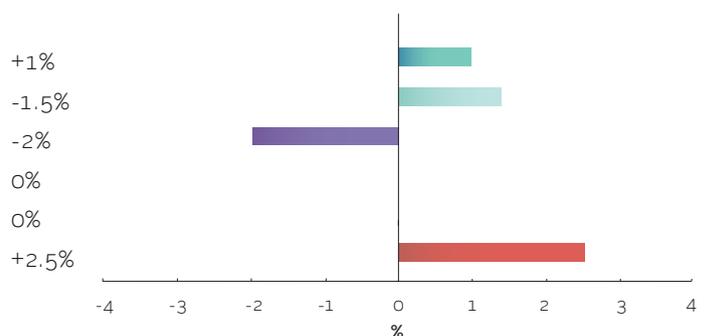

How we are managing your money

- At the start of the month, we cut our exposure to equities after a strong run in the markets by reducing our overweight in emerging markets (EMs), and we shifted the proceeds into cash;
- We also rebalanced the portfolios which meant we put more money into the UK All Companies and UK Equity Income funds;
- US equities fell after US President Donald Trump increased trade tariffs on \$200 billion worth of Chinese goods, and China responded by raising tariffs on an additional \$60 billion of American goods;
- We expected trade tensions to rise ahead of the G20 meeting at the end of June, so we moved underweight in equities by further reducing our allocation to EMs;
- Sterling was relatively calm against the US dollar as the Prime Minister announced that she would resign on 7th June after cross-party Brexit talks with Labour failed to reach a compromise;
- Mrs May's resignation triggered a leadership contest in the Conservative party, with Brexiter and former foreign secretary Boris Johnson favourite to win;
- We continue to monitor developments, particularly the unpredictability of trade tensions between the US and China and the potential impact of the Tory leadership contest on Brexit negotiations;
- Overall, the portfolio is defensively positioned- marginally underweight equities, underweight fixed income, neutral alternative strategies and overweight cash.

Current Asset Allocation

Overweight/underweight position relative to Strategic Asset Allocation

Who is managing your money?
